Subject: Responsible Conduct of Research Framework-Support for Hoffman Suggestions

To whom it may concern,

I write to express my support for the response put forth by Dr. Michael Hoffman to the tri-council's Proposed Revisions on the Responsible Conduct of Research Framework, found here: <https://hoffman.bitbucket.io/2021/rcr-framework.html>. Decreasing secrecy around investigations of scientific misconduct is the foundation of such a policy. We need to do better with this in Canada, and the suggestions put forth by Dr. Hoffman are practical steps to improve how we as a scientific community handle these issues.

Thank you,
Julie Claycomb
